

Spelling list: Unit 14 homophones - set 2

This word list focuses on another set of homophones — words that sound the same but have different spellings and meanings. Learning these words will help you use them correctly in both writing and speaking.

For example, *lord* (a title of nobility) and *laud* (to praise) may sound identical, but they have completely different meanings. Similarly, *sore* (a painful spot) and *saw* (a tool for cutting) share the same sound, but are used in different contexts.

Studying these homophones will help you write more accurately and avoid common spelling mistakes. Try working with these words in a *spelling game* to improve your language skills!
