

Spelling list: Short /i/ spelled y : set 2

Here's the rewritten version with more examples from your list: The short /i/ sound is the vowel you hear in words like *sit* and *bin* . It's made by placing your tongue near the front of your mouth, with your lips staying relaxed. This sound is brief and sharp, unlike the long /i/ sound in words like *tree* , where the tongue is higher and the sound is held longer.

In many English words, the short /i/ sound is spelled with the letter *i* . However, in words of Greek origin, the letter *y* often represents this sound. Some examples include *gym* , *myth* , *lyric* , and *crystal* . Other words that use this spelling pattern include *system* , *oxygen* , *physics* , and *symbol* .

These activities will help you practise recognising and spelling words where *y* represents the short /i/ sound, such as *hymn* , *syrup* , *symptom* , and *typical* .
